Ways to Save Money on Your Cell Phone Bill

<http://tech.yahoo.com>

1. **Right size your minutes.** If you have a substantial number of minutes leftover every month, cut back as much as possible.
2. **Check for services you don't use.** Did your plan automatically sign you up for a service (i.e. emergency roadside assistance) that you didn't ask for and you never use?
3. **Get rid of old games and ring tones.** Rather than spend \$2.50 on a ring tone, make your own out of the MP3 you (or your children) already own, for free.
4. **Take advantage of in-network and friends and family plans.**
Many carriers offer free calls to certain numbers or other phones on their wireless network.
5. **Consider pay-as-you-go.** If you only make a few calls a month, smaller carriers (Virgin Mobile, Boost) let you pay by the minute. Cingular, Verizon, and T-Mobile offer prepaid plans.
6. **Axe data services.** Do you really need mobile e-mail? Text messaging? High-speed web browsing? If you do, keep it, but at \$15 to \$50 extra a month, you could be facing an extra \$600 in expense each year for something you never use.
7. **Stop with all the texting.** If you are paying by the message. That's about 15 cents for each "Hey what u doin?" Just call the person instead.
8. **Don't be afraid to dispute inaccurate charges.** Watch your bill closely for third-party charges which you may not have authorized. Identify where the charges are coming from, as soon as possible.
9. **Report lost or stolen cell phones immediately.**
